

LubTool[®] 2000

Lubricating and fine oil

LubTool[®] 2000 is used for greasing, removing, preserving and cleaning in all application fields, even in technically unpreventable, occasional contact with food. LubTool 2000 is NSF H1 registered and approved for the food and pharmaceutical industry.

Advantages:

LubTool[®] 2000 offers the best temporary corrosion protection on metallic surfaces and guarantees excellent lubrication of mechanical elements even at extreme minus temperatures.

LubTool[®] 2000 cleans oil and grease contaminated surfaces, effortlessly removing fretting corrosion and is neutral to all typical plastics and elastomers.

LubTool[®] 2000 is free of silicon, acids and resins.

Application:

Rub **LubTool[®] 2000** in circles to remove the fretting corrosion and, then clean with a cloth afterwards. Repeat this if necessary.
